Temperance movement

The question whether alcohol is a good or a bad thing has long divided opinion. At the beginning of the 19th century widespread criticism of alcohol gained ground in Britain and elsewhere. Those who advocated abstinence from drink, as well as some who campaigned for prohibition (banning the production, sale and consumption of alcohol) started to band together from the late 1820s onwards.'

Please see below a selection of alcohol free cocktails for those who wish to enjoy the mixed drink culture without developing the infamous 'jakewalk'
